Unit Costs

DetectaFone is a highly versatile and effective intrusion alarm system, protecting a large number of monitored locations over a wide area. The only limitation is available mobile phone network coverage.

DetectaFones can be installed internally or externally and operate even in a concealed position. They detect audio, vibration and thermal alarms and provide instant

notification to the pre-programmed receivers.

Install simply and quickly to almost any location where there is a need for rapid intrusion notification. DetectaFone will text or call up to 3 pre-programmed numbers when an alarm condition occurs.

Based on mobile phone technology DetectaFone uses GSM networks.

DetectaFone Mobile Intrusion Alarm

DETECTAFONE MOBILE SURVEILLANCE

DetactaFone

- **GSM-Module**
Works like a common mobile phone, dials 3 preset numbers
- **Three Coloured Push Buttons**
For specific call alarms

Reacts to movement in 5 metres
- **Accoustic Sensor/ Microphone**
Reacts to noises
- **Vibration Sensor**
Reacts to vibrations
- **Charger/ Power-Supply**
Powered by mobile phone battery or use the mains charger
- **Protection Zones**
Define protection zones

The World's most portable and versatile alarm system using GSM technology.

Install simply and quickly to almost any in-home or vehicle location where there is a need for rapid intrusion notification. Text or call up to 3 pre-programmed numbers when an alarm condition occurs.

DetactaFone is a new security and alarm system based on mobile phone technology utilising the GSM networks. Two models are available; the DetactaFone Compact and the DetactaFone Light. Both systems come with built in sensors.

No Installation required, just hide the unit in an appropriate place and set the required functions. No power supply needed as its built in battery has a standby time of up to 200 hours. Use the supplied charger for extended period of times.

DetactaFone's can also provide a useful upgrade to other GPS products such as EnviroCam, SchoolCam, SmartCam and MemoCam.

We also provide a tailored service which is specifically driven by meeting your requirements.

“ We approached Globe Police Solutions to specify a product suitable for a high profile national operation, seeking to protect the public railway infrastructure. GPS recommended a rapid deployment, remote solution, which satisfied our requirement, exactly and economically.

The results were excellent and building on this success, we are now working with them (GPS) on enhanced product development.

Aside from the advice and supply, the pre and post sales service was exemplary. ”
